**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, 13-18, drawn to mobile service switching center for changing the number of calls in multical communication mode for use in a switching center system in class 455, subclass 560.
  - II. Claim 11, drawn to base station controller, classified in class 455, subclass 560.
  - III. Claim 12, drawn to multicall communication mode supporting terminal, classified in class 455, subclass 550.1.
2. Inventions group I, group II, group III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of group II has separate utility such as it may operate properly with other MSC, not necessarily the MSC in Group I. The group III has separate utility such as it may operate properly with other MSC, BSC, not necessarily the MSC in Group I and BSC in Group II. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or Group III, restriction for examination purposes as indicated is proper. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their

Art Unit: 2685

recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
